

## What is the Foundation for a Miracle?

The Foundation for a Miracle was established in early 2005 to assist Rochester area families who have a family member with Friedreich's ataxia (FA) and to contribute to FA research. All net proceeds from the tournament will benefit Friedreich's ataxia research and will assist families whose children have been afflicted with the disease.

### What is Friedreich's ataxia?

Friedreich's ataxia is a neurodegenerative disease affecting about one in 50,000 people. People who are afflicted with FA have degeneration of the long nerves of the spinal cord, the cerebellum and the nerves carrying sensation to the hands and feet. The disease is steadily progressive and death may occur in early adulthood. While there is no known treatment or cure for Friedreich's ataxia, worldwide research is ongoing, and it was only seven years ago that researchers identified the gene that is linked to the disease. Continued research will hopefully identify ways to minimize the effects of this hereditary disease. Fundraisers such as this event will continue to channel money directly to the researchers working so diligently to solve this disease and to the families who have been impacted by this disease.
